ATTACHMENT C - PROPOSER INFORMATION AND CERTIFICATION SHEET

ATTACHMENT D - COBID CERTIFICATION / OUTREACH PLAN

ATTACHMENT E - RESPONSIBILITY INQUIRY

ATTACHMENT F – OPTIONAL PHISHING SIMULATION TRAINING TOOLS

SECTION 1: GENERAL INFORMATION

1.1 INTRODUCTION

The State of Oregon, acting by and through the Department of Administrative Services, Procurement Services ("DAS PS"), on behalf of Department of Administrative Services' Enterprise Information Services ("EIS") and all other Authorized Purchasers, including all Oregon Cooperative Procurement Program ("ORCPP") members, is issuing this Request for Proposal ("RFP") to establish one or more Price Agreements for the purchase of Cybersecurity Awareness Training Services and Materials.

The State desires the services of one or more information security education and awareness contractors to provide materials and services to support user education awareness programs, which must target numerous audiences, and which will be made available for purchasing by multiple state agencies and local governments through one or more statewide price agreements. **A Proposer does not need to offer all the training materials and services listed in this RFP to be considered for award.**

DAS PS intends to enter into one or more Price Agreements for Cybersecurity Awareness Training Services and Materials. Any purchases under a Price Agreement must be authorized by purchase orders issued by an Authorized Purchaser, and purchases may only be made by ORCCP members in accordance with the ordering procedures described in the Buyers' Guide that will accompany the issued Price Agreement(s). If more than one Price Agreement is awarded, selection and award of contract(s) to be entered into under the Price Agreements will follow a Best Value process.

The initial term of the Price Agreement(s) is anticipated to be 5 years with options to renew up to a cumulative maximum of 15 years for each Price Agreement.

The State will consider Proposals from Proposers that can provide the necessary goods and/or services that fulfill the identified needs for cybersecurity awareness training services and materials. Additional details on the scope of the Goods and Services are included in the Scope section.

DAS' EIS contains within its organizational structure the office of Cyber Security Services ("CSS"). CSS brings together enterprise security capabilities into a single organization. CSS is responsible under ORS 276A.300 for enterprise security policy, security monitoring of the state network, enterprise incident response, and enterprise security architecture, as well as dissemination of security training, policy, and best practices across state government. CSS desires to engage in one or more contracts for the Goods and Services, following a Best Value process in the event of award of more than one Price Agreement, for cybersecurity awareness training services and materials suitable for its program goals and needs.

Notwithstanding the foregoing, Proposers are advised that there is no guarantee of any specific amount of purchases under a Price Agreement. Further, notwithstanding the award of a Price Agreement, DAS PS may conduct separate solicitations or award project-specific contracts or purchase orders for Goods or Services similar to what is described within this RFP using any method allowed by law.
